000 - World of Orchids – Asia
GUIDELINES AND DEFINITIONS
Use THIS list to register plants, artwork, exhibits, etc. for Ribbon Judging of 2019 MOS show

These guidelines are provided to help you determine correct class in which to register items for judging.

Enter a plant in the lowest numbered class unless instructed otherwise in alliance-specific instructions. Plants may be entered in **one flower class only**. Any plant registered in a flower class may be entered in an alliance-specific 'special' class or in Classes 129 or 130 (Grown in the Home) or Class 151 (Fragrance).

When classes are delineated by color, register the plant based upon its **background / predominant** color unless noted in the alliance-specific instructions.

It is the responsibility of the Exhibitor to confirm that entries are correctly classified. If you have questions, ASK for assistance. Plants that are incorrectly registered may not be judged.

DEFINITIONS

GENUS - A natural grouping of closely-related species. Dendrobium is an example of a genus. The name of a genus is capitalized.

Species: A kind of plant that is distinct from other plants. It is not the product of a cross. *Species* names are not capitalized and are printed in *lower case italics*. Example Cattleya ***mossiae***. (*Species* classes may include 'natural' hybrids.)

Hybrid: The offspring of a cross between species or hybrids. Hybrid names are capitalized.

Primary hybrid: A hybrid of no more than two species.

Complex hybrid: A hybrid with no fewer than three genera.

Intragenetic hybrid: A hybrid whose parents are from more than one *species* but only one genus.

Intergeneric hybrid: A hybrid between members of two or more genera. (Hint: -ara at end of genus indicates 3+ genera in background)

Judges have the right to award or withhold any scheduled trophy or ribbon, and may subdivide or combine any plant class when warranted. First, second and third place ribbons are awarded for each plant class at the discretion of the judges.

UNLESS CLEARLY DESIGNATED OTHERWISE, EVERY EXHIBITED PLANT IS ELIGIBLE FOR AOS AWARDS, AND EXHIBITORS AGREE TO COMPLETE AOS REQUIREMENTS FOR AWARDED PLANTS.
